

At **KMA** Services we provide a full range of electrical services. Our professionals are trained in the installation and maintenance of all large scale business electrical requirements. We look after everything from power distribution to control systems, installation, upgrades and testing.

KMA Electrical Services

At KMA Services we provide complete electrical solutions. From design through to certification, our staff are trained to meet all industrial, commercial and domestic electrical installation and maintenance requirements. We deliver practical and streamlined solutions that are tailored to be cost effective and as energy efficient as possible.

Our staff are fully qualified and we run regular training sessions to ensure the highest quality service is delivered at all times.

We also provide a wide range of mechanical and electrical testing services. Thermographic imaging, in particular, is a fast and reliable way of locating faults or overloads on a system, while at the same time, avoiding any downtime or loss of production. Some insurance companies will offer discounts if regular testing programmes are set up.

KMA Services are members of RECI, F-Gas and the BESS register.

Our extensive range of clients include:

Symantec Ltd

ESB Sportsco

Cheeverstown

Coachbury Taverns
